## **How to install SDKMAN on Windows 10**

Directions: Please follow these steps

## Step 1:

Go to this Link, <a href="https://chocolatey.org/install">https://chocolatey.org/install</a> and install chocolate into your machine. Copy this code, and past in *Windows* terminal or command line.

Set-ExecutionPolicy Bypass -Scope Process -Force; [System.Net.ServicePointManager]::SecurityProtocol = [System.Net.ServicePointManager]::SecurityProtocol -bor 3072; iex ((New-Object System.Net.WebClient).DownloadString('https://chocolatey.org/install.ps1'))

## Step 2:

Similarly, go to this link, <a href="https://chocolatey.org/packages/zip">https://chocolatey.org/packages/zip</a> and <a href="https://chocolatey.org/packages/zip">choco install zip</a> package. To do so, open your Windows terminal or Command Prompt and past this code .

choco uninstall zip

This will install *choco uninstall zip* package into your machine; because SDKMAN requires this package.

## Step 3:

This is the last step you need for your SKDMAN installation. So, go this website <a href="https://chocolatey.org/packages/unzip">https://chocolatey.org/packages/unzip</a> and install unzip package as we did in step two.

choco install unzip

As we have done in other steps, open your Windows Command Prompt or terminal and past this code choco install unzip and then enter. This will install choco install unzip package. Congratulations!
