How to install SDKMAN on Windows 10

Directions: Please follow these steps

Step 1:

Go to this Link, https://chocolatey.org/install and install chocolate into your machine. Copy this

code, and past in *Windows* terminal or command line.

```
Set-ExecutionPolicy Bypass -Scope Process -Force; [System.Net.ServicePointManager]::SecurityProtocol
= [System.Net.ServicePointManager]::SecurityProtocol -bor 3072; iex ((New-Object
System.Net.WebClient).DownloadString('https://chocolatey.org/install.ps1'))
```

Step 2:

Similarly, go to this link, https://chocolatey.org/packages/zip and install *choco install zip* package.

To do so, open your Windows terminal or Command Prompt and past this code.

```
choco uninstall zip
```

This will install *choco uninstall zip* package into your machine; because SDKMAN requires this package.

Step 3:

This is the last step you need for your SKDMAN installation. So, go this website
https://chocolatey.org/packages/unzip and install unzip package as we did in step two.

```
choco install unzip
```

As we have done in other steps, open your Windows Command Prompt or terminal and past this code

choco *install unzip* and then enter. This will install *choco install unzip* package.

Then: Follow the instructions on <u>this</u> website and you will be able to download SDKMAN.

_____

   Congratulations!

Best Regards
